

## ERO

Fixed Surface

Workstations and  
Tables provide for General  
Office, Training &  
Computer Applications.

## The ERO Collection Workstations & Tables

## ERO

Single and Dual Surface  
Adjustable Tables move  
to meet users needs for  
height and sit-stand  
applications.

**VIKING**

# The ERO Collection

## Additions:

The new ERO Fixed Height Tables and Single or Dual Surface Adjustable Tables add greater flexibility to the need for change and flexibility in today's office and computer environments.

**1.0 The ERO Fixed Surface Tables** were designed to compliment the ERO Collection when additional worksurfaces are required. In addition, if you are planning a new workstation or changing it later, the **ERO Fixed Surface Workstation** adjusts to change easily with one of five fixed height locations. Build a workstation by starting with a table, then add another table, a return or an extension. If storage is required just order a table with a shelf, or an overhead cabinet. Use the ERO Fixed Surface Workstations with your panel system, private office, or as free standing workstations. They make excellent training tables, worktables, or full workstations.

1.0 Worktable

1.1 Worktable/Extension

1.2 Worktable/Return

1.3 Worktable/Corner &  
Worktable/Shelf

**2.0 The new ERO Single or Dual Surface Adjustable Tables** are perfect for computer applications requiring the need to adjust the worksurface height. They can be used in conjunction with the fixed height tables, support stations or to complete a workstation. The addition of a PostionMate™ mechanism to a single surface adjustable table creates a dual surface table that allows the user to adjust either surface and provides them with a sit-stand workstation.
